Capabilities Statement

SciAps, Inc., is a Boston-based instrumentation company specializing in portable analytical instruments. Our mission is to provide durable, field-tested, portable instruments to identify any compound, any mineral, any element — anyplace on the planet. Manufacturing, service and customer support is operated out of our fully ISO-certified facility in Laramie, WY.

SciAps designs, manufactures, and sells durable, field-tested handheld Raman and LIBS analyzers that analyze alloys, environmental contaminants, explosives and precursors including IEDs and HME's, illegal narcotics and hazardous materials.

At SciAps, customer service is an extension of our commitment to provide you with exactly what you need, where — and when — you need it. When you reach out to us, you'll talk to a person, not a machine.

Core Competencies

- Raman Analyzers
- Metal/Alloy Analyzers

Differentiators

Whether your question is about a new instrument, a rental, an application or a service matter, you'll be quickly directed to someone who can help. Our global network of outstanding salespeople, application specialists and distributors who specialize in analytical instrumentation is the product of expertise we have sought and relationships we have nurtured for years. SciAps is here to answer your questions, understand your analytical challenges and provide you with the best Raman solution to meet your needs.
